

# J-Pak Technology Guide 2022

## Fume Extraction AD4000IQ

Quality Control Equipment 

## Fume Extraction

The AD 4000 iQ delivers superior and measurable performance ensuring airflow and filtration is maintained even when particulates start to build up from the triple DeepPleat DUO and combined filter setup

This makes it suitable for the most demanding and complex installations, so you can rely on extended filter life, together with effective removal of fumes and particulates. It's user friendly too, with a design that makes easy work of filter changes and the easy to read and access controls display panel is conveniently located on top of the unit. The AD 4000 iQ design permits reater flexibility

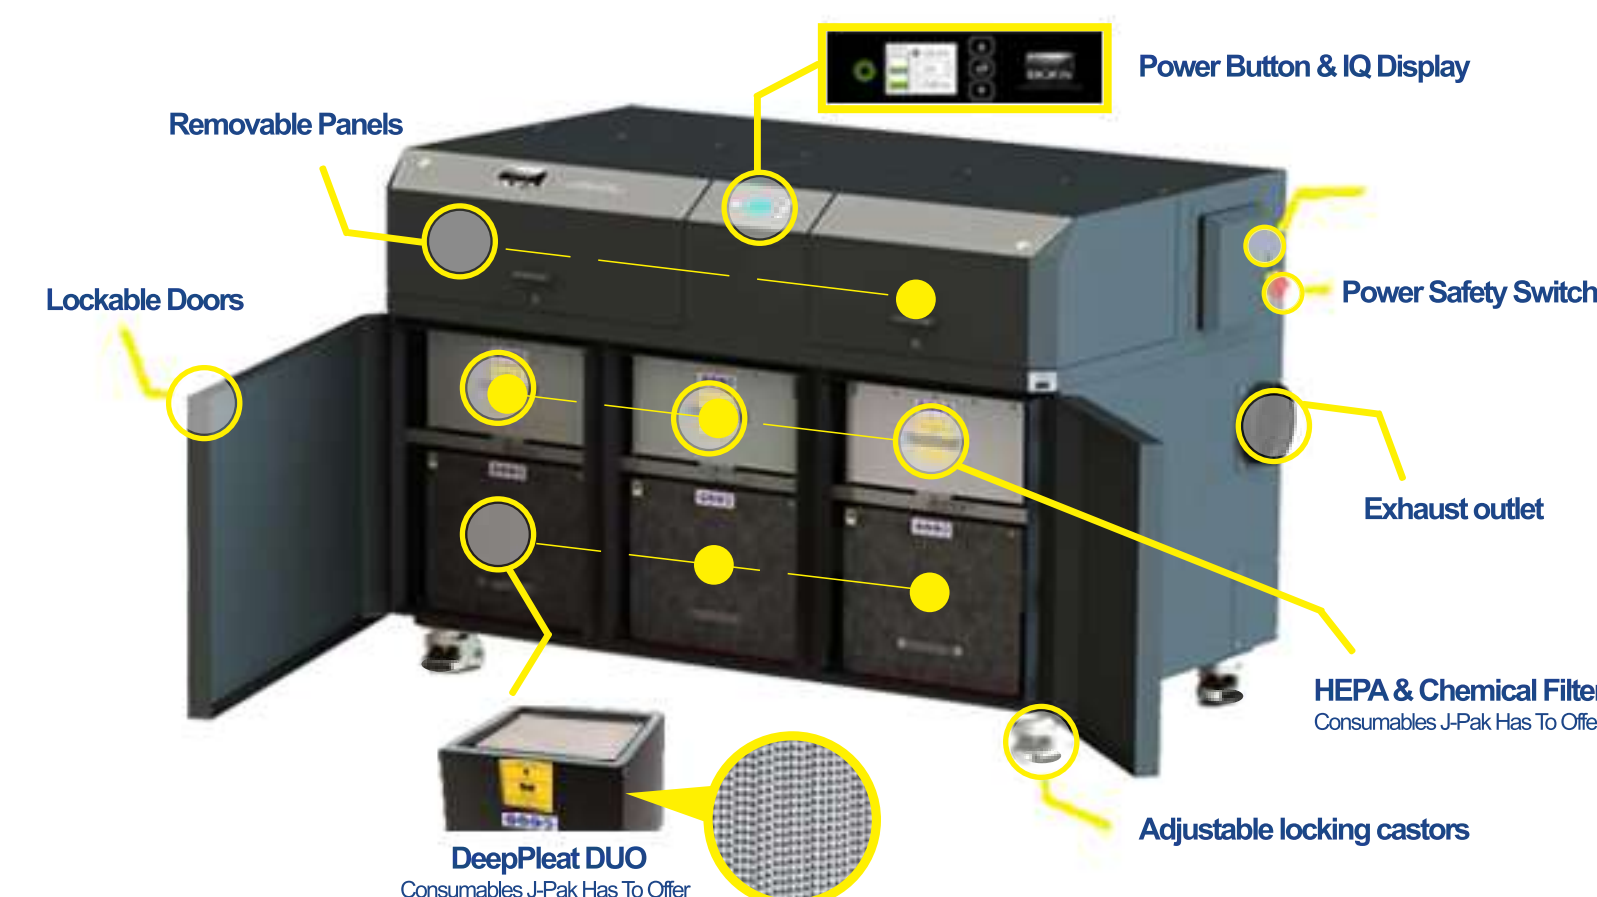

Different exhaust configurations allow recirculation via the rear panel or externally vented hose connection systems

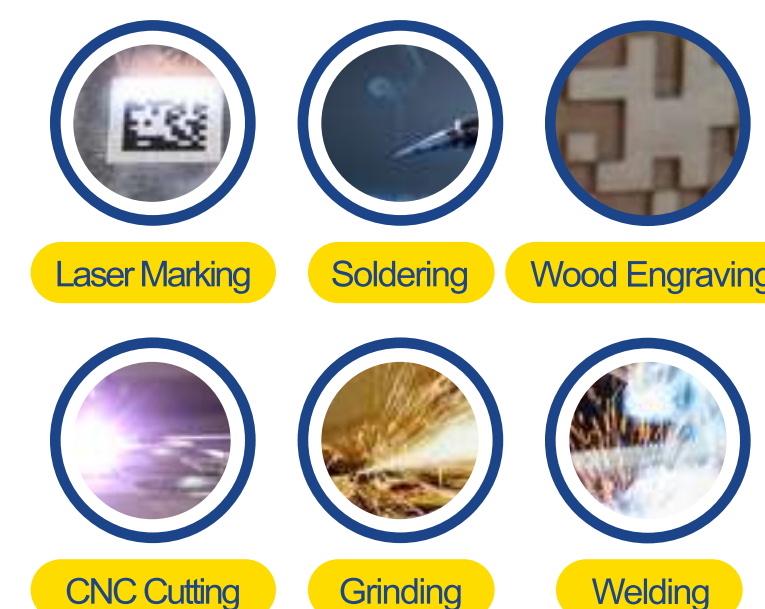

### Superior Above The Rest

Automatic flow control - AFC

### Discover The Machine

### Ideal For These Applications

### Can Also Be a Blower

For Cooling Down Laser Coders

### Key Benefits

- ✓ Intelligent (iQ) Operating System
- ✓ DeepPleat DUO
- ✓ HEPA Filter
- ✓ Automatic flow control - AFC
- ✓ Reverse flow air (RFA) technology
- ✓ Advanced carbon filter (ACF) technology

### More Incredible Technology
