Label Applicators
HERMA 040M Wrap Around

High performance *without compromise*

Don't choose between speed, precision, usability and reliability
– with the HERMA 040M, you can have it all

The Hema 040M high-speed wrap-around labeling system is a cost effective labeling system that offers the highest standards of product security. Ideally suited to the pharmaceutical, healthcare and beverage markets. It is capable of applying a single label or two labels in orientation to each other, around the circumference of the product. Quick changeover times combined with unrivalled precision and reliability make the HERMA 040 the ultimate high-speed wrap around labeling system

Automatic synchronization of labeling and product speeds

Wrap-around labeling for an all-around seamless product

Products from a wide variety of industries have one thing in common: More and more legal requirements for labeling make it necessary to use the available space on the products as efficiently as possible. For cylindrical containers, wrap-around labeling is therefore ideal, in which the product is completely or partially wrapped with the label along the circumference - which is why it is also referred to as wrap-around labels

Ideal For Round Applications

Perfect For Can and Bottle Labeling

Capable of achieving labelling speeds up to 120 products/min. the clocked rotary star guarantees precise labeling with extreme performance

Key Benefits

- ▶ Precise dispensing: Even with relatively long labels
- ▶ A user-friendly, ergonomic design, low makeready times and easy format changeover provide a further plus in terms of cost-effectiveness
