

Checkweigher TELTEK C80

Maximize Profits with exact portion control

High precision, high speed! Teltek C80 is our most advanced checkweigher. It enables up to four parallel weighing systems controlled by one user interface. With this checkweigher solution you'll have great performance in dynamic weighing with maximal overview and control

Don't give away product for free

**Reliable & Easy To Use
Always Accurate**

What is a Checkweigher?

A checkweigher is an automatic machine for checking the weight of packaged commodities. It is normally found at the outgoing end of a production process and is used to ensure that the weight of a pack of the commodity is within specified limits. The Teltek designed precision engineered C80 weigh platform guarantees weight stability, accuracy and repeatability

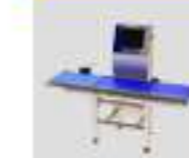

Ideal For These Applications

High precision, high speed PC based Windows™ operating system with a large 15" multifunction touch screen Teltek C80 is a PC based Windows™ in line checkweigher featuring a high specification 15" touch screen display for ease of use and maximum operator flexibility. The C80 offers a range of belt sizes and reject devices to suit customer specific needs including Air Blast, Push-er, Single or Double Flipper/Divert Arm and Drop Flap. Designed and manufactured to the highest engineering standard with inherent reliability and longevity for use in tough, hostile environments
