❋ HERMA Label Applicator

Coding & Marking Equipment • Label Applicator

J-Pak Support 24/7 365

Label *Application*

Don't choose between speed, precision, usability and reliability
– with the HERMA 500, you can have it all

The HERMA 500 is also exceptionally fast with a maximum speed 70 ft/minute higher than the H400. A maximum speed of 650ft/minute can be reached. The module offers short makeready time and offers industrial-grade Ethernet connection

Automatic synchronization of labeling and product speeds

What is a label applicator?

Label printer applicators are basic robots that automatically print and apply pressure-sensitive labels to various products. Some types of labeling include shipping labeling, content labeling, graphic images, and labeling to comply with specific standards

CE Certified

60.0

What The Label Looks Like

GOOD FOOD.
GOOD HEALTH.

Type of Label Application

Top & Bottom	Front & Back	Wrap Around	L & C Wrap
