CO₂ Laser Coder Printer

LINX CSL Series

Coding & Marking Equipment

LINX Laser Coder
Coding & Marking Equipment • CO₂ Laser Coder

CO₂ Laser Marking

The Linx CSL30 Laser System marks complex codes at a high resolution onto high-speed lines. The 30 W laser power combined with a powerful processor allows coding onto hard surfaces to mark materials such as glass and rubber

Full system IP65 rating makes it a reliable coding solution for harsh production environments such as beverage, automotive or extrusion Laser coding permanently changes the surface of the substrate. For example, when laser coding painted card, the very top layers of paint are removed revealing the contrasting bare card underneath

High Quality Laser Marking

Reduce running cost with little to no downtime

What The Print Looks Like

Discover The Machine

Key Benefits

- ✓ Laser tube life of over 100,000 hours
- ✓ Fine spot size for high quality codes
- ✓ Two beam orientation options allows coding in any direction

Available Options

Wattage
Print Speed

| LINX CSL10 | LINX CSL30 | LINX CSL60 |
|----------------------------|----------------------------|-----------------------------|
| 10-Watt Up To 900 m/min | 30-Watt Up To 900 m/min | 60-Watt Up To 6000 m/min |
