

J-Pak Technology Guide

Thermal InkJet Printer

T-Series
Including The Mperia Controller

Coding & Marking Equipment

Coding & Marking Equipment • Piezo InkJet

High Resolution

Hi-Res Piezo InkJet Printer

Perfect for high-visibility branding and product information. Remove costs from your production process by replacing pre-printed boxes or labeling systems with direct carton marking. Our T-Series inkjet printers produce crisp barcodes and exceptional graphics on your porous substrates

**Less Ink Consumption
Exceptional Barcode Readability**

**Savings On Labels & Pre-Printed
Boxes & Packages**

Print Height of 50-100mm

This high-resolution piezo inkjet printer provides exceptional barcode readability in case coding applications. Its superior ink efficiency and a recirculation auto-prime function allows for less ink consumption than other brands

■ Up To 84m / min print speed at 600DPI

What The Print Looks Like

Ideal For These Applications

Carton

Paper

Wood

No more label machine jams or pre-printed box changes stopping your production line. Our low-maintenance direct carton printers pair with MPERIA for easy message changes without the downtime. High-resolution quality and spot color for barcodes and graphics produce clean, highly visible marks, even on darker substrates. Whether you're currently using labels or pre-printed boxes, switching to direct carton marking is significantly cheaper. Free up warehouse space, reduce downtime, cut labor costs and reduce material costs by marking directly on the package

Key Benefits

- ✓ Lower Cost
- ✓ Improve quality
- ✓ Decrease downtime
- ✓ Fast Printing

Available Options

Print Height
Print Direction

Matthews T50e

Up To 51mm
Horizontal - Side

Matthews T100e

Up To 102mm
Horizontal - Side

Matthews T100se

Up To 102mm
Vertical - Down
